

Vidéotem

Man can use the Videotem in a shop, a company hall or any fare, congress, or conference. The Videotem is able to display a slide presentation of the company products or services.

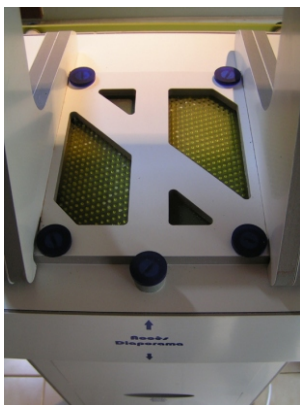

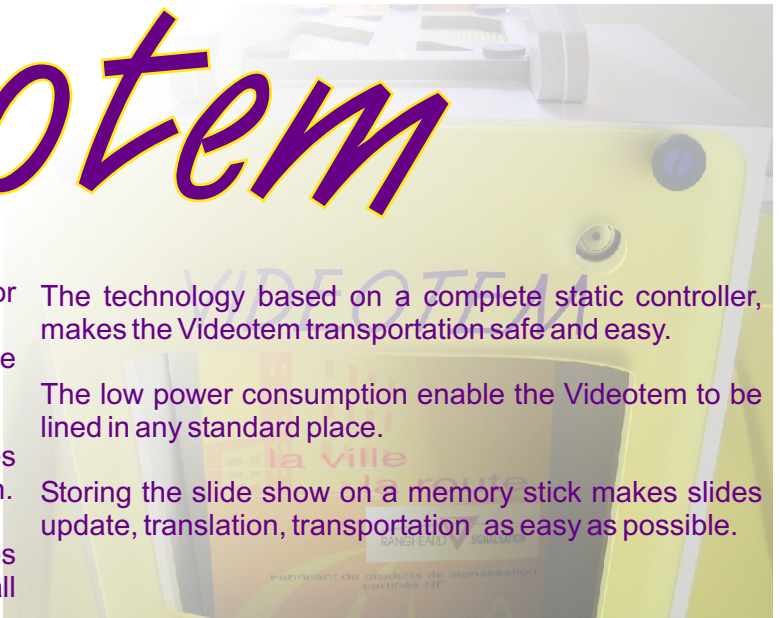

The user can tune his communication based on images to point out his know how or special skills in any occasion.

The pre-set slide architecture allow world wild companies to communicate on a same slides base reducing all translations steps to their minimum.

The technology based on a complete static controller, makes the Videotem transportation safe and easy.

The low power consumption enable the Videotem to be lined in any standard place.

Storing the slide show on a memory stick makes slides update, translation, transportation as easy as possible.

The functions

1 The Slide-show : It will be longer or smaller according to the number of slides to be displayed and according to the final loop time targeted. The slide-show can be modified as people like. The software is opened so that there is no need of Signalprod to update the slides.

2 Daily calendar : a daily calendar is onboard, it is programmed up to 2007. Following years will be available beginning 2006.

3 Announcements : using the keyboard shortcuts it is easy to write and store any text. The preset text options includes 1 title text line 9 description text lines one price line.

In the announcement loop each slides can display up to two announces

4 Leaflet holder : Every Videotem is designed to hold and present the company leaflets.

The type of documents and the number of storing volumes are defined with the customer.

5 The design : The Videotem is an image product so Signalprod makes it to the company colours and communication standards.

6 Additional services : It is possible upon request to add other devices or functions to the Videotem standard base such as special hardware and software.

Technical features :
LCD Monitor 17" NEC
Controller 1GHz Static
+Sound inboard+ 256 MO Ram
Os Linux Compact
OS storage : CompactFlash 128MO
Slide-show storage Stick USB 64 MO

**New or modified specifications available upon request*
